

LST GROUP

NOTICE

Revision: May 2018

HELPFUL GUIDES AVAILABLE

As part of purchasing your Universal Laser System from LST Group, you receive ongoing help from our support department to achieve the best results possible.

One part of this support, LST Group has created many useful guides for our customers.

Some of the guides available include:

- Maintenance
- Computer Requirements
- Focus Calibration
- Laser Beam Alignment
- Laser Tube Installation

If you require one of our guides or further help with the information contained in this document, please contact the LST Group support department at support@lstgroup.com.au

Dear Valued Customer,

LST would like to thank you for purchasing a Laser Platform.

Before powering on the system for the first time;

1. Make sure the ambient temperature is between 10°C and 35°C. If the system has been subjected to colder temperatures, allow the system and the lase cartridge at least 1 hour to “thaw” to room temperature before powering up otherwise serious damage may occur.
2. Remove any accessories or literature inside the system.
3. Remove the rubber bands or tie straps that keep the motion system arm from moving.
4. Assemble the system according to the instructions in the Operations Manual.
5. Read the ENTIRE Operations Manual before attempting to operate the system.

Once again, thank you for purchasing the exciting new technology!

Sincerely,

LST Support Department
